-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. Claims 1-2 are presented for examination.

#### ***Oath/Declaration***

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

Non-initialed and/or non-dated alterations have been made to the oath or declaration. See 37 CFR 1.52(c).

#### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for "the entry by the first issuer" in line 6 of claim 1. It is not clear what the metes and bounds of "the entry" are.

There is no antecedent basis for "the entry by the second issuer" in line 11 of claim 1. It is not clear what the metes and bounds of "the entry" are.

Claim 1 recites that the "first multi-jurisdictional program contract counterparty is selected from the group including..." and that the "second multi-jurisdictional program contract counterparty is selected from the group including..." This is improper Markush

Art Unit: 3694

claim format since Markush limitations should state "selected from the group consisting of." (See MPEP 803.02)

Appropriate correction is required.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bahar (US 2002/0143687 A1).

Bahar discloses a method implemented by a programmed computer system for use in connection with the sale of notes issued by a first issuer bound by regulations of a first jurisdiction and the sale of notes issued by a second issuer bound by regulations of a second jurisdiction, wherein the first jurisdiction and the second jurisdiction are distinct from one another (Fig. 4(b) – Items 1 and 2 fall under the jurisdiction of New York, NY, while Item 3 falls under New York, NY, Hackensack, NJ, and/or Miami, FL), which method comprises the steps of:

[Claim 1] inputting data regarding the entry by the first issuer into a first multi-jurisdictional program contract with at least one multi-jurisdictional program contract counterparty, wherein each first multi-jurisdictional program contract counterparty is selected from the group including a trustee, a principal paying agent, a custodian, a

paying agent, a transfer agent, an arranger, a calculation agent, a disposal agent, a process agent and a swap counterparty (Figs. 2, 4(b), 4(c), 5; ¶¶ 18, 19, 21, 31-33, 38-39, 43 – The specific type of counterparty does not affect the structural elements or the manipulative steps of the claimed invention and therefore will not serve to patentably distinguish the claimed invention over the prior art);

inputting data regarding the entry by the second issuer into a second multi-jurisdictional program contract with at least one multi-jurisdictional program contract counterparty, wherein each second multi-jurisdictional program contract counterparty is selected from the group including a trustee, a principal paying agent, a custodian, a paying agent, a transfer agent, an arranger, a calculation agent, a disposal agent, a process agent and a swap counterparty (Figs. 2, 4(b), 4(c), 5; ¶¶ 18, 19, 21, 31-33, 38-39, 43 – The specific type of counterparty does not affect the structural elements or the manipulative steps of the claimed invention and therefore will not serve to patentably distinguish the claimed invention over the prior art);

inputting data regarding the purchase of each note by a noteholder (¶¶ 29-37 – Bids to purchase each note are entered);

calculating payments due each noteholder based at least in part upon the input data regarding the purchase of each note (¶¶ 29-37 – Bids to purchase each note are entered. The winning bid indicates payments due upon purchase of each note); and

processing the calculated payments to provide the payments to the noteholders (¶¶ 35, 37; Bad debt items are sold to the winning bidder, thereby implying that payments to the noteholders are made in exchange for the bad debt items);

Art Unit: 3694

[Claim 2] wherein each first multi-jurisdictional program contract counterparty is the same entity as each corresponding second multi-jurisdictional program contract counterparty (Fig. 4(b) – A single party may purchase various bad debt items in the form of a lot).

### ***Double Patenting***

7. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

8. Claims 1-2 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-2 of copending Application No. 11/175,501. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.
